

Access Management Solution (AMS)

Integration with HRM/ Payroll System

A Safer, Faster And Smarter Way Towards The New Normal

Why Access Management Solution?

Traditional Access Management

Card Access – Turnstile

- Close contact
- Card duplication

Finger Print Reader

- Close contact
- Not friendly to physical disabilities personnel

Tenant / Staff / Visitor

- Card duplication
- Unable to trace number of visitors/staffs in the building
- Unwanted visitor

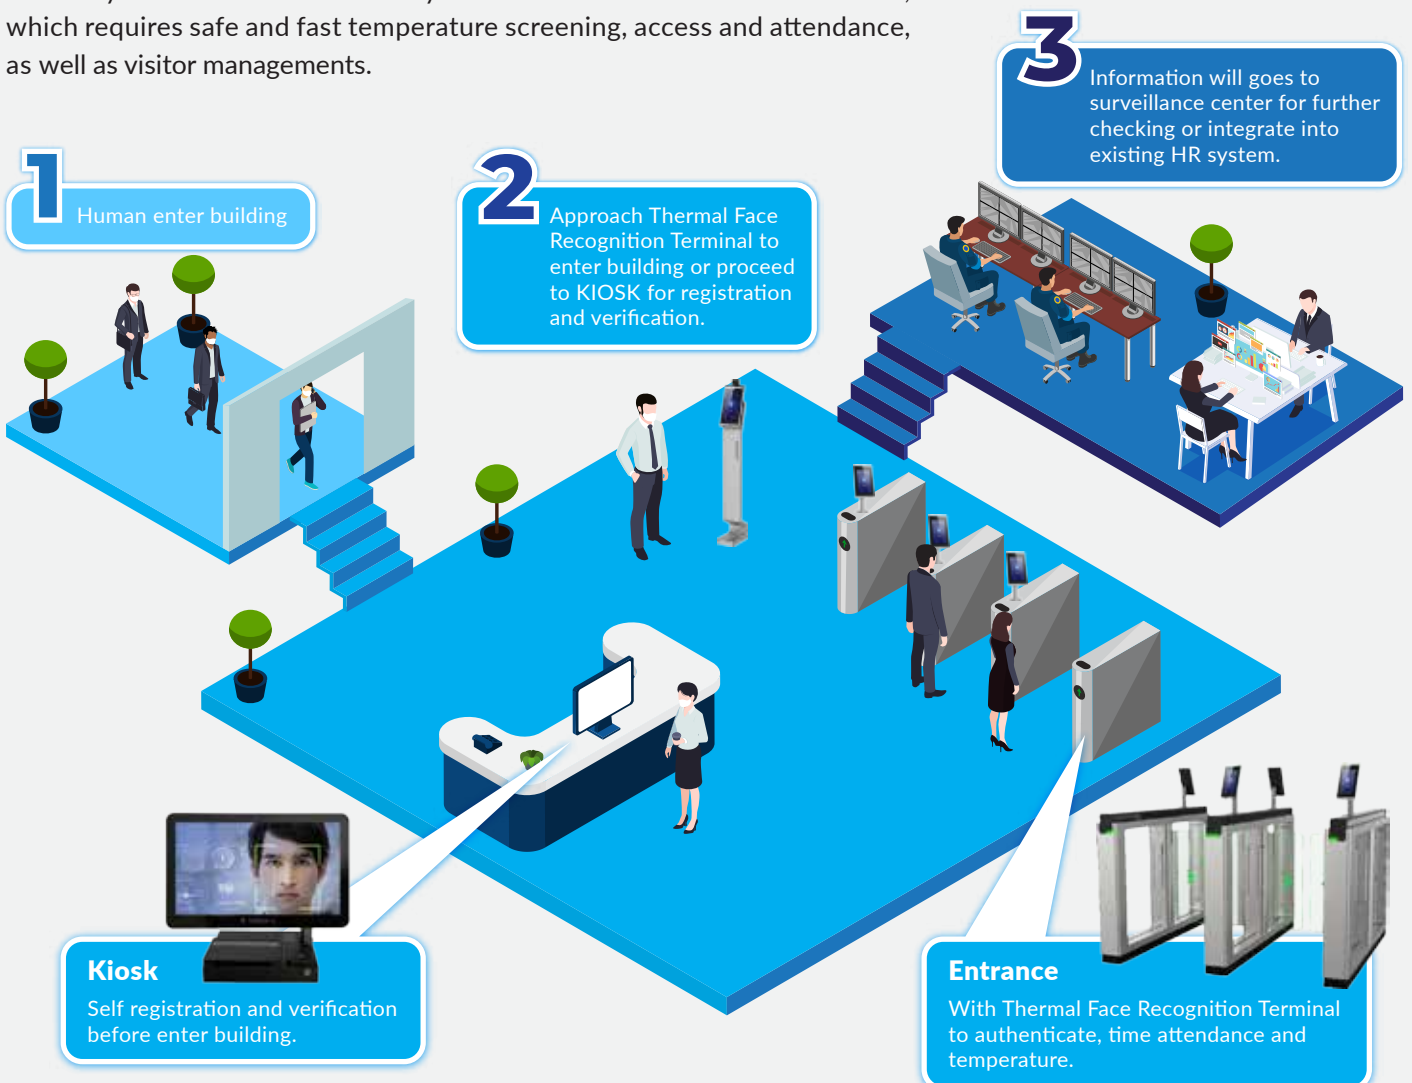

Building Management

- Inaccurate data collection
- Faulty or lost card.
- CAPEX

New Approach

Designed to be modular and scalable, it is ideal for businesses to maximize efficiency of their access control systems under the new normal situation, which requires safe and fast temperature screening, access and attendance, as well as visitor managements.

Access Management Solution

Contactless Social Distancing

Facial recognition to register and record the temperature of staffs/ visitors - eliminating contact.

Time Attendance

Facial recognition to record employees' time in, time out and integrate with HR payroll system.

Reporting & Analytics

Live and historical record of staffs and visitors. Exportable report for audit use.

Alarm & Evidence

Instant alarm and photo when fever is detected.

Speed & Accuracy

Face recognition scanning duration : 0.2s
Temperature accuracy : ± 0.5 °C

Mask Detection

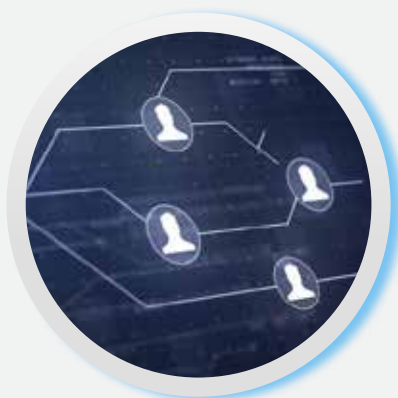

Support face mask wearing alert & 'forced mask wearing' mode.

Why AMS For Your Business?

Compliance

Compliance with SOP imposed by MITI & authorities

Contact Tracing

Manage & track COVID-19 outbreak and contain the spread

Integration with HR System

Collect staff and visitor info for future reference and monitoring

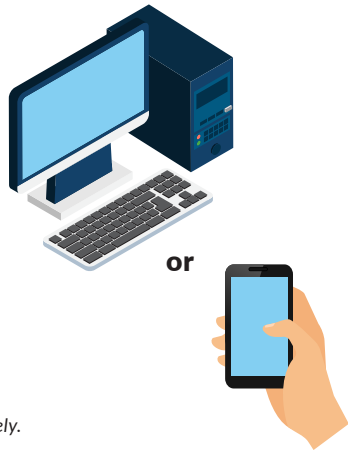

How It Works?

Step 1

Fill In The Self-Declaration Form

- Pre-registration via link (via the link provided by staff)
- Walk-in registration (placed at point of entry)

**Based on organisation SOP respectively.*

Step 2

Verification & Fever Detection

Head over to the terminal. Face recognition to capture time, attendance & simultaneously detects your temperature – and data is wired to HR system. (optional)

Products Highlights

Thermal Face Recognition Terminal

Flexible Deployment

Supporting wall mounting, floor standing with mounting pole and mounting on turnstiles.

Enhance Verification Performance

Face recognition verification duration

- Less than 0.2s.
- Supporting face anti-spooling.

Long Term Fever Screen

Authentication distance: 0.3 - 2.0m.

Various Verification Methods

Supporting fast temperature measurement and face/card recognition with fever screening.

Dedicated For Fever Screening

- Temperature range: 30°C to 45°C
- Temperature accuracy: +0.5 °C

Mask Detection

Supporting face mask wearing alert and forced mask wearing alert.
